

US-Var | Transfer entropy across all tested lags

Green: VPD → ET Orange: soil water potential → ET Solid: TE Dashed: critical TE

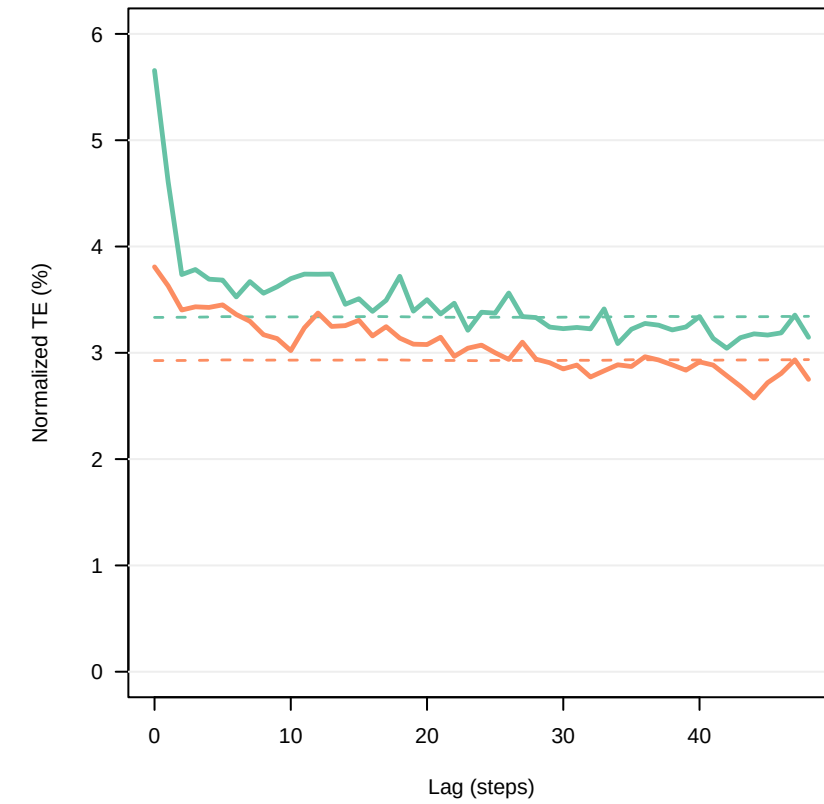

Hourly | N = 180225

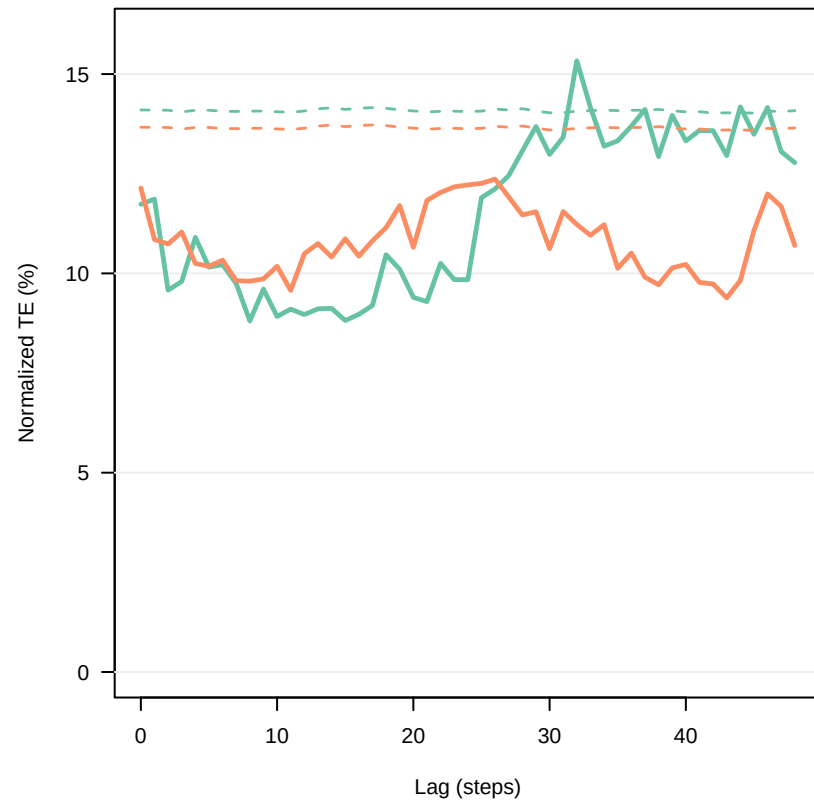

6-hourly | N = 29868

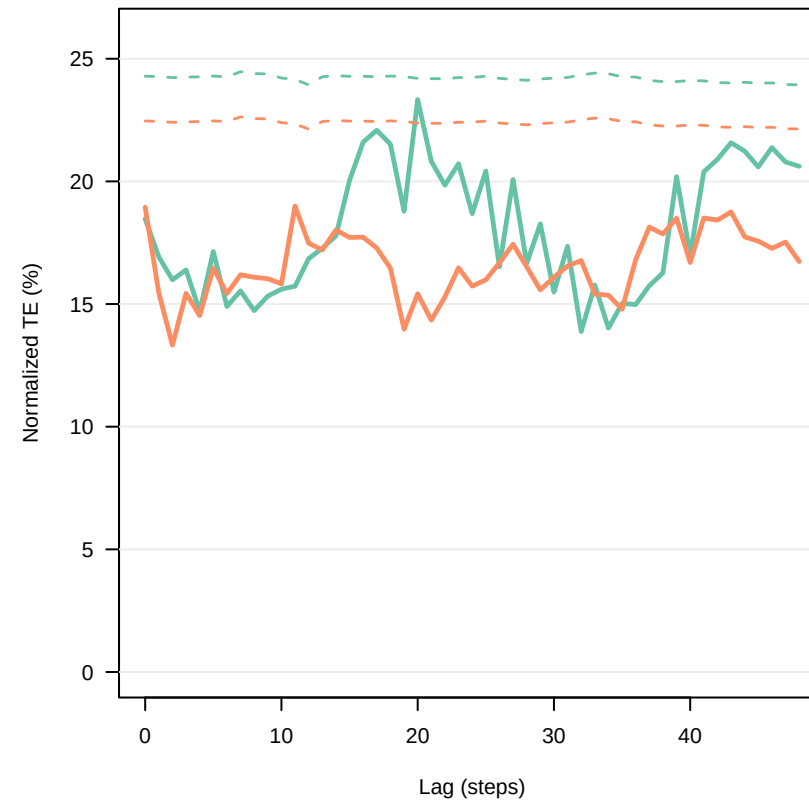

Daily | N = 7513

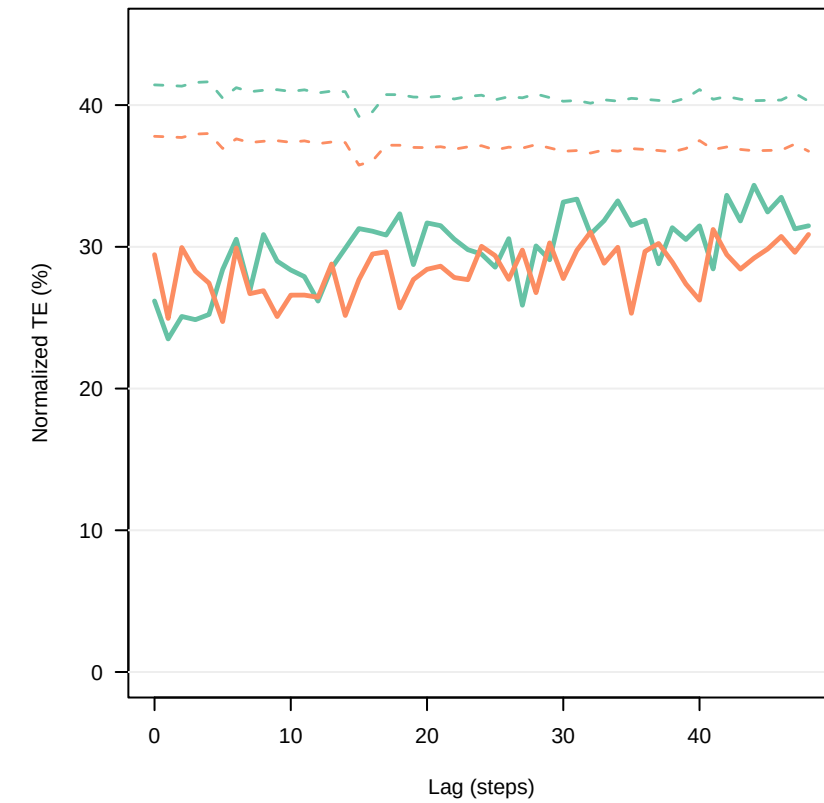

Weekly | N = 1072

Biweekly | N = 537

Monthly | N = 247

Critical TE is constant in bits; its normalized value varies with sink entropy at each lag.
